

## REMCO BUILDERS, INC. AWARDED FEMA CONTRACTS

(BRADENTON, FL)--**REMCO Builders, Inc.** was recently awarded two residential remodeling contracts from the Federal Emergency Management Agency (**FEMA**).

The first project involved REMCO Builders raising a house in east Bradenton by 10 feet to alleviate a recurring flooding problem. The project was completed in four months, on time and on budget.

The second FEMA contract entails raising a house above the base flood level by adding a second story, essentially creating a new house using the existing foundation. The ground level of the house will be abandoned as a living space. The addition of the wood frame second story includes impact resistant windows and doors that meet state hurricane standards. The house is located in northeast Bradenton and the project is slated for completion in November.

REMCO Builders, Inc. specializes in residential and commercial construction, new construction and remodels, and demolition and/or renovations and repairs to fire-damaged properties. [www.remcobuilders.org](http://www.remcobuilders.org)
